

The Truck Manufacturing Industry

Featuring a Truck Manufacturer's Paint Shop in the South Central United States

leadec

Project Overview

A major truck manufacturer with 500,000+ sq.ft. of facility space has been a long-standing partner with Leadec over the past 28 years and counting. The client aimed to improve their facility's paint shop cleanliness significantly in order to enhance the output quality and protect valuable assets for the company.

Main Challenges

The biggest challenges facing this contract were:

- High requirements in technology and quality.
- Maintaining the high standards of customer care and support that have attributed to the lasting partnership.

Leadec's Solution

The technical cleaning agreement allowed Leadec to improve the manufacturer's facility, leading to smoother production and higher quality output.

Leadec used the latest processes to ensure fast, efficient cleaning that would not damage materials. For sensitive areas like paint shops, Leadec found suitable and creative solutions to fit the client's requirements, thanks to established expertise.

Leadec employed several other operations to improve this specific facility's paint shop including: performing particle count studies to drive continuous improvement, repairing and replacing light bulbs and ballasts for the LED, and creating a Defect Library cataloging encountered contaminants.

About the Client

Client industry: Truck Manufacturing

Leadec customer since:

1995

Facility Size:

**500,000+
sq.ft.**
